'Needs Resources', an established organization in Telangana & Andhra Pradesh, in the field of civil works, is now expanding its services and offering comprehensive products and services in fire safety systems and equipment, We strive to bring state-of-art quality and dedication in our services.

Why do you need us ?

Fire safety systems and equipment are of utmost importance for protecting lives and property in the event of a fire. Here are some of the key reasons why fire safety systems and equipment are so significant:

- **Protecting Lives:** Fires can spread rapidly and cause significant harm to anyone in their path, protecting lives is against uncertainty is crucial
- **Protecting Property:** Helps mitigate the property & financial loss, as it helps contain fire and prevents them from spreading, limiting the amount of damage
- **Compliance with Regulations:** It is a mandatory regulation to have fire safety systems and equipment in place. Failure to comply with these regulations can result in fines, legal liability, and other consequences.
- **Reducing Insurance Costs:** Insurance companies typically offer lower rates to buildings that have robust fire safety systems and equipment installed.
- **Peace of Mind:** Creates an protective ambiance for building occupants and owners, helping people feel safer and more secured,

◆ How do we add value ?

We as an organization can add value in the below mentioned areas

- **Provide Expert Advise:** We provide expert advice in latest technologies in fire fighting and fire safety codes and regulations.
- **Comprehensive Solutions:** Provide comprehensive fire safety solutions that address all aspects of fire safety, including prevention, detection, suppression, and evacuation.
- **High-Quality Equipment:** Install and manage high-quality fire safety equipment, such as fire extinguishers, sprinkler systems, and fire alarms
- **Training:** Provide training to building occupants on fire safety procedures and evacuation plans. This can include regular fire drills and training sessions.

Whom we cater ?

We at Needs Resources cater to a wide range of settings, including residential, commercial, industrial, and public buildings, our projects are completely customized to meet the specific needs of the customer. We also undertake regular maintenance and testing of the systems to ensure proper functioning and effectiveness of the instruments.

◆ Our Services

Fire pump room

We facilitate the setting up of Fire Pump Rooms, that provide a reliable water source to sprinkler and hydrant systems during a fire emergency. Maintaining constant water pressure, which requires precise engineering of pumps, valves, and other components.

Hydrant system

We assist in designing and fixing the building's hydrant system with a strategical approach in compliance with the building codes that include installing heavy duty underground piping , fire escape hydrant valves and regular maintenance.

Fire extinguishers System

We install fire extinguishers based on building codes and regulations, ensuring it is readily available and easily accessible to individuals to respond to fires quickly and effectively.

Fire Signages

They are crucial for fire safety, communicating emergency procedures, escape routes and the location of fire safety equipment. Customization and maintenance are important to ensure their effectiveness. We bring our expertise in installing them to comply with the building regulations.

◆ Our Services

Automatic sprinklers system

We ensure that automatic sprinkler systems are designed to detect and quickly extinguish fires, providing a first line of defence against the spread of fire. We offer regular maintenance to ensure proper functioning and readiness in the unexpected event of a fire.

Two way talk back system

We ensure the installation of two-way talk back system enables user friendliness, with simple controls and clear instructions, making communication effective even for those unfamiliar with them.

Public address system

A PA system is a crucial component of fire safety systems, providing communication and alerting in emergencies. It can be integrated with other systems, customized to meet specific needs, and requires regular maintenance to ensure proper function.

Analogue addressable fire detection & alarm system

We install sophisticated fire safety systems that uses sensitive sensors to detect fires in their earliest stages can identify the specific location of a fire, transmitting signals to emergency responders, we assist in configurations to minimize false alarms.
